**Sponsorship Levels**

You can play a vital role as a sponsor for this educational event that integrates learning science and math with written and oral communications skills as students engage in a comprehensive real world experience. Saying yes to sponsoring this event demonstrates an active interest in encouraging middle school students to consider engineering and related career fields. These students are the future city planners, architects, landscape designers, energy consultants, computer technicians, and, of course, engineers. An organization that supports their efforts to be better prepared to pursue these fields and become an active participant in their city is contributing to the future success of our communities. We hope you will consider one of these sponsorship levels:

**$100 Patron**
- Program & Website Recognition

**$200 Special Award * **
As a Special Award Sponsor your contribution will pay for a plaque that identifies your business/organization as a sponsor and the name of the team who won your Special Award category. The award will recognize students for displaying excellence in an area related to your business or organization. You may also provide the winners with items bearing your organization’s logo and present the award at the competition.

- Program, Website Recognition, & Judging (optional)

**$500 Designer**
- Program and Website Recognition
- Competition Mention

**$1000 Developer**
- Program and Website Recognition
- Competition Sign
- Award Ceremony Mention

**$2000 Innovator**
- All other sponsor recognitions plus
- Final Award Ceremony Recognition
- and Presentation of Award

**$5000 Visionary**
- All other sponsor recognitions plus
- Speaking time at Award Ceremony and
- Display Table or Competition Sign

Contact Carol Dostal, Director of Outreach Programs for the School of Engineering, Technology, and Computer Science, to learn how you can become a sponsor.
