Clarification to Uploading Virtual City Forms

You will load all of your team’s deliverables onto the teacher page in the Competition Management System.

When uploading your virtual city simulation there are two options.

1. Submits City Simulation – this is for SimCity 4 and you will click on the Browse button and upload the game simulation from your hard drive.

2. Submit Online City Simulation – this is for submitting the new version of SimCity
When you click on the on-line version you will need to fill out the drop down box. This is the same information that is on your Virtual City Form (which also will need to be submitted.)
